

ROAD DESCRIPTION

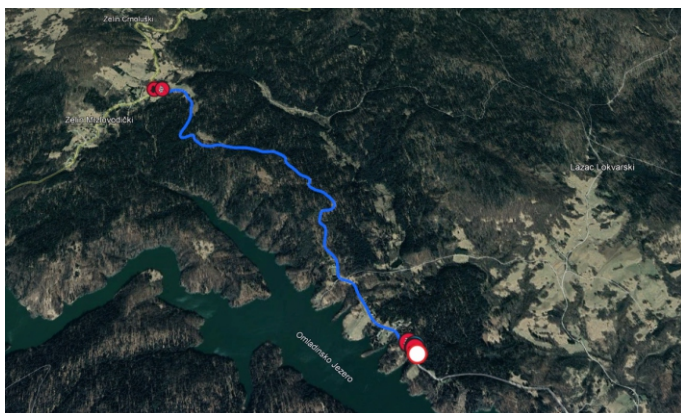

Distance: 3,48 km in one direction.

The combination of slow and fast parts may be found over the test stage. The road is relatively narrow with several cuts and small crests. Tarmac on this stage is gray without any bigger changes, quite slippery. Service park is on the closed section of the road prior to the beginning of the test stage. The half of service park can be set on restaurant parking (situated uphill). The space is adequate for up to three larger trucks and a catering van.
